CAPITAL BRIDGE™
Strength Behind Every Structure

INCOME ENGINEERING — STRATEGIC WEALTH REPORT

Income sustainability: offsets, unlocking capital, and allocation under your stated assumptions.

Prepared for: **Sample Client**

Generated: **7 April 2026 at 08:08**

CONTENTS

Section A — Opening
Advisory framework context
Trial or paid: The Lion's Verdict
Section B — Advisor Read
Model inputs and expectations
Income, expenses, and unlocking capital
Investment allocation
Coverage and sustainability charts
Optimisation themes
Section C — Deeper analysis
Assumption sensitivity
Methodology notes
Appendix & closing

SECTION A — OPENING

OPENING

What this shows

Where Income Engineering sits in the Capital Bridge journey, then — when your plan includes it — the Lion's Verdict on income structure, using the same numbers as Section B.

Why this matters

Orientation and judgement come first, then the fact base, so the read follows a natural advisory sequence.

CAPITAL BRIDGE FRAMEWORK

CAPITAL BRIDGE ADVISORY JOURNEY

How to read this report

Step 1B — Engineer your income structure

This report follows your sustainability check (Forever Income).

At this stage, the question shifts from:

"Can this structure last?"

to:

- Where can income be strengthened within the current setup?
- Which assets can be unlocked into usable capital?
- How can surplus be intentionally converted into long-term capital growth?

WHAT THIS MODEL DOES

The Income Engineering Model focuses on how capital moves, not just how it sits.

It shows:

- Where income already exceeds requirements (surplus)
- Where capital may be unlocked from existing assets
- How structured use of capital (including borrowing) affects long-term outcomes

WHY THIS MATTERS

Different structures can produce very different outcomes over time.

Rather than assuming what should or should not be done, this model allows:

- the cost of capital to be compared against expected outcomes
- the impact of each decision to be observed under consistent assumptions
- the structure to be evaluated as a system, not in isolation

All results remain scenario-based and are not guaranteed.

WHAT HAPPENS NEXT

© Capital Bridge. All rights reserved. Unauthorised use or distribution of proprietary content and outputs is prohibited.

From here, the advisory journey continues:

Capital Health → assesses whether the structure remains sustainable over time

Capital Stress → evaluates how the structure behaves under changing conditions

THE LION'S VERDICT

STABLE

Lion score: 100 / 100 · STABLE

"The lion stands insulated. Conditions do not affect outcomes. Stability is independent."

SUMMARY

Your current structure produces RM15,825 against RM8,000, leaving a surplus of RM7,825.

The structure exceeds requirements. Current strategy can be maintained. No adjustment is required.

WHY THIS IS HAPPENING

This surplus exists because income exceeds expenses, allowing capital to remain intact.

SYSTEM STATE

Lion Score: 100 · green

WHAT YOU SHOULD DO NEXT

Lion score 100 places the structure in the strong band, so the next move is to protect surplus and sharpen efficiency.

SECTION B — ADVISOR READ

ADVISOR READ

What this shows

Expectations, income, loans, unlocking capital lines, allocations, coverage, and headline status — the numbers you are reviewing together.

Why this matters

One agreed fact base before Section C, so you can separate what the model says from what you might change next.

INPUT SUMMARY

YOUR MODEL INPUTS

The tables below reflect the assumptions you agreed for this review: expectations, income, any loans from unlocking capital, each unlock line, and investment buckets.

EXPECTATIONS

Currency: RM

Desired monthly expenses: RM8,000

MONTHLY INCOME

Salary / Wages	RM12,000
Rental Income	RM0
Family Contribution	RM0
Other Recurring Income	RM0
Total recurring income	**RM12,000**

© Capital Bridge. All rights reserved. Unauthorised use or distribution of proprietary content and outputs is prohibited.

LOAN REPAYMENTS (FROM UNLOCKING CAPITAL)

No loan facilities modelled from unlocking capital.

UNLOCKING CAPITAL

Property Refinance

Property Refinance · Enabled

Property value RM0 · Target LTV 70% · Interest 4% p.a. · Tenure 20 yr

Short-Term Low-Cost Loan

Short-Term Low-Cost Loan · Enabled

Principal RM0 · Rate 3% p.a. · Tenure 5 yr

INVESTMENT BUCKETS

Capital Preservation	RM200,000 · 3% p.a.
Retirement Savings	RM150,000 · 5.5% p.a.
Income Assets	RM180,000 · 5.5% p.a.
Growth Assets	RM250,000 · 7.5% p.a.
Diversifiers & High-Risk	RM50,000 · 6% p.a.
Total allocation	**RM830,000**

VISUAL ANALYSIS

COVERAGE (FROM YOUR INPUTS)

What this shows

How far monthly inflows (including modelled investment income) cover total outflows in a typical month versus the weakest month you modelled.

Why this matters

Advisory conversations often anchor on an average that hides a thin month — pairing median and weakest-month coverage keeps both in view.

Median monthly coverage: **197.8%** · Weakest month: **197.8%**

Interpretation

Together, these two reads show whether the income story is robust or merely “usually fine” on the assumptions captured in this report.

KEY OUTCOMES

STATUS

Investment Income	**+RM3,825**
Total Capital	**RM830,000**
SURPLUS	**197.8%**
Status	**SUSTAINABLE**

SECTION C — DEEPER ANALYSIS

DEEPER ANALYSIS

What this shows

Interpretation of sustainability, practical next steps, and the improvement story that fits the Section B picture.

Why this matters

Keeps judgement and options after the facts, so the conversation can move from alignment to action.

STRATEGIC INTERPRETATION

WHAT THIS MEANS

SUSTAINABLE

On these assumptions, recurring inflows and modelled investment income cover expenses and loan commitments comfortably, including in a weaker month. The structure looks balanced for the story you told the model.

NEXT STEPS

KEEPING THE PLAN CREDIBLE

- Keep return assumptions conservative enough to survive scrutiny.
- Revisit the scenario when income, expenses, or debt service changes.
- Schedule an annual check-in even when the picture looks strong.

“Steady structure deserves steady discipline — not complacency.”

APPENDIX & CLOSING

DISCLOSURES AND NEXT STEPS

What this shows

How to use this report, regulatory context, and the next step in the Capital Bridge journey.

Why this matters

Closes with a clear handoff: what this document is for, and where to go next with your adviser.

DISCLOSURES & HOW TO USE THIS REPORT

This document comes from the Capital Bridge Income Engineering model and is meant for discussion with your adviser. It is not personal advice. The footer on each page carries the full legal notice.

HOW TO USE THIS REPORT

- Review it in a client meeting alongside your live model inputs.
- Treat illustrations as scenario-based, not guaranteed outcomes.
- When assumptions change materially, refresh the live model before the next review.

Recommended next step — Capital Health

Capital Health summarises withdrawal sustainability, structural confidence, and capital trajectory under your assumptions — a natural follow-on once income and allocation are aligned in this model.

Next: Run Capital Health to continue your advisory journey.

CLOSING

This report is for advisory purposes only. Illustrations rest on your assumptions and are not a guarantee of future outcomes. The footer on each page carries the full legal notice.
